

s: 211E – the roof window
with panoramic views

Progress never stands still:

Our philosophy is based on manufacturing high-quality, durable products that undergo a continuous process of optimization. The tried-and-tested s:211 top-hung roof window has been developed further according to the latest energy standards and is now available in four new versions.

Thanks to its innovative construction, the s:211 E top-hung roof window allows rooms to be flooded with light. The outer glass pane is a vision of frameless elegance, while the inner pane is surrounded by a narrow aluminum frame. The subtle, minimalist design creates a panoramic view and makes indoors and outdoors blend into one.

Inner frame size: 4400 x 1400 mm

Inner frame size: 2000 x 2000 mm

Inner frame size: 1890 x 1080 mm with external shading

Inner frame size: 1154 x 2196 mm with external shading

The top-hung roof window can be easily installed flush at angles of 10 degrees and above in existing or new Eternit and shingle roofs, plus tiled roofs of all kinds – even where access is restricted. The s:211E can also be installed in flat roofs using the s:207 roof frame. The patented versions of the s:211 E top-hung roof window meet the latest energy requirements:

- Maximum sizes are dependent on installation type, location and casement weight
- Fixed glazing or top-hung

Flush roof installation:

- With concealed motors at the side
- Fixed glazing
- With or without interior shading/blackout blinds
- With visible front motors
- With or without attached shading
- With or without jamming protection

Recessed roof installation:

- With concealed motors at the side
- With visible front motors
- Fixed glazing
- with integrated external shading running on the sash
- With or without interior shading/blackout blinds
- With or without jamming protection
