

GROUPY BRINGS GREAT ADVENTURES TO A MUSEUM.

All4Groups Systems is an Austrian expert in designing electronic communication and information systems for different areas in group tourism. **Groupy** is the next generation of audio transmission systems.

Groupy is an individually customizable, hybrid tool – the perfect symbiosis of a **classical audio guide** and **live transmission device** – equipped with manifold exciting additional features and benefits. Groupy blends an innovative group management tool and tour guide system with professional audio guide features.

Groupy can transmit **live tours**, offers the opportunity to explore **indoor exhibitions** independently and even **outdoor experiences** can turn into real adventures, thanks to location-based information and **fully-automatic content triggering** (via GPS). **And all of this - without changing the device!**

A multifunctional device in proven **modular design**, which can be tailored precisely to your **individual needs** and areas of application.

Your perfect companion – made in Austria.

Tell YOUR STORY and your museum can be experienced with or without a professional human guide!

UNIQUE. SIMPLE. FLEXIBLE.

| | |
|--|--|
| AUDIOGUIDE | Play back content (in all common audio formats) by manual number entry or automatically triggered by the tour guide (remote content trigger). |
| TEXT TO SPEECH | Independent creation, editing and updating audio files through integrated text-to-speech software (written text becomes an MP3 file) without recording studio. |
| LIVE STREAMING | Real time audio transmission in excellent sound quality. |
| GPS MODUL | Geofencing in the outdoor area with automatic position recognition and content triggering. |
| MULTI LINGUAL & SIMULTANEOUS INTERPRETING | Freely configurable language selection, any number of languages. Combination of live streaming and audio content allows multilingual guided tours as well as professional simultaneous interpreting. |
| DUAL SPEAKING & DIALOGUE MODE | Simultaneous speaking of two people or question & answer function to engage the audience. |
| GROUPY SYNC SOFTWARE | Data transmission, processing and management |
