

ClearKlens

Hygiene solutions for the cosmetic industry

ClearKlens Hygiene Solutions

Specialist proven detergent and disinfectant formulations developed for cleaning and disinfection of pharmaceutical and cosmetic manufacturing facilities.

- Products manufactured in facilities certified ISO 9001, ISO 14001
- Disinfectants supported under local biocidal regulations
- Tested according to microbiological standards
- Complete technical documentation including: Test methods, certificate of analysis, materials compatibility supplied

Open Plant Cleaning

An extensive range of formulated detergents designed to remove even the most challenging soils through manual, foam / gel spray or soak applications. Validated biocides with proven efficacy against bacteria, yeasts, fungi and viruses.

Solutions for all pharmaceutical equipment cleaning applications from manual cleaning of sensitive parts, to automatic foam cleaning of filling machines.

Cleaning in Place (CIP) Chemical Range

The extensive Diversey CIP chemical range offers non-foaming detergents and disinfectants designed for circulation through process equipment. The combined effects of solution turbulence, chemical energy and heat remove soil debris and microorganisms from pipe work and ancillary plant without time consuming dismantling and manual cleaning.

Diversey Hygiene Solutions

IntelliCare Hand Hygiene

A package of clearly colour coded products, dispensing equipment and signage designed to be used on entry to the production area and throughout a shift at designated wash stations.

- Complete package
- Hygienic dispensers
- Training and support material available
- Dispensing and Dosing Equipment

Comprehensive range of quality dispensing and dosing equipment selected to complement the chemical product range. Wherever a chemical is used on site an automated dosing and or application systems can be installed to reduce safety risks and increase productivity. Our equipment experts can recommend the key area of your facility that could benefit from an equipment solution.

- Carefully selected range of quality equipment with a proven track record of use in our customer's sites.
- Installation and maintenance service available

Building Care

The extensive Diversey building care range encompasses solutions for offices, kitchens, washrooms and floors - providing a one stop shop for all your hygiene chemical and dosing requirements.

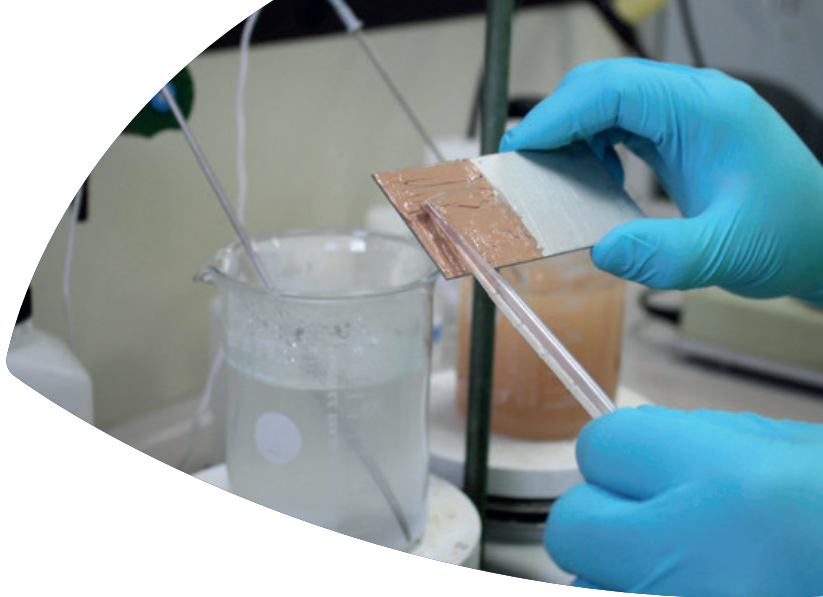

Process Improvement Services

ClearKlens DSP

It can be difficult to find the most effective cleaning procedure to remove and clean pastes, ointments, emulsions, make-up, powders etc. The ClearKlens Detergent Selection Program is designed to select the best detergent for each soil under specified conditions.

- Removes complexity from the detergent selection process
- Allow customers to access our knowledge, experience and expertise in soil removal
- Tailored procedures for each soil / process, specific to the customers product and facility

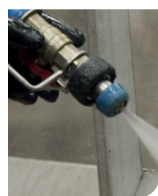

Diversey Hygiene Academy

From basic chemical handling training to advanced cleaning in place or membrane cleaning courses, the Diversey Hygiene Academy online training packages offer your employees the opportunity to advance their knowledge and continue their professional development.

- Certified courses
- Single user or company wide platform available
- Consistent course delivery
- Economical training at a time to suit each trainee
