

Your
**Vitamin D
Booster**

ILANGA
renewing freshness

With the
active ingredients
of
Living Stones

The daily burst of freshness for optimized skin texture!

Living Stones enliven the desert like little dewdrops. Neither extreme heat, nor drought, nor the sun can harm the extremely resistant plant. We use this strategy for Ilanga. With the help of a sustainable biotechnological process, we obtain the active ingredient Nectaria Lithops from the plant cells of the Living Stones: Vitamin D synthesis without the sun, intensive deep hydration without injecting hyaluronic acid.

Our target group and their requirements

ILANGA
renewing freshness

Preventive skin care for active women from the age of 25, who want an energized start to their day.

Too little sunlight, dry indoor air, pollutants in the environment – ILANGA addresses these stressors with the effective power of Living Stones: Vitamin D synthesis by means of NECTARIA LIT-HOPS supports a natural tan, creates a radiant complexion and moisturizes the skin.

ILANGA Day cream

Deep moisturizing care for a natural glow and firm complexion. Also suitable as primer.

ILANGA Night cream

Soothes the skin and renews cells while sleeping.

ILANGA Body Lotion

Easily absorbed moisturizing lotion for a velvety and smooth body sensation.

ILANGA Quick Active Serum

Intensively moisturizing booster for stressed skin.

Our solution

ILANGA
renewing freshness

Ilanga is the efficient cosmetic for women who want to start their stressful day in energized fashion and still look radiant in the evening. Who want to live in harmony with and learn from nature. Who want to strengthen their skin's self-confidence:

ILANGA trusts in a natural mode of action.

The active ingredient NECTARIA LITHOPS is certified in accordance with renowned natural cosmetics standards, and is also vegan. Production out of biotechnologically obtained cell cultures conserves valuable resources.

- All formulations are vegan
- Up to 98.5% from natural ingredients
- Dermatologically tested
- Sustainable packaging

Natural effect

ILANGA
renewing freshness

In ILANGA, we combine the secret of Living Stones, the active ingredient NECTARIA LITHOPS, with the positive effects of moringa oil.

Natural light protection

Harmonious skin texture without irritations or impurities, with a matting effect.

Deep moisturizing effects

Deep hydration makes the skin look firm and fresh as dew.
For a natural glow.

Firm and elastic

Anti-collagenase prevents collagen degradation and thus loss of volume of the skin. The dermal-filler effect acts like a hyaluron injection.

More resilience

The active plant ingredient zeatin in moringa oil protects the skin due to its strong antioxidant effects and ensures that all nutrients get to where they are needed.

Vitamin D

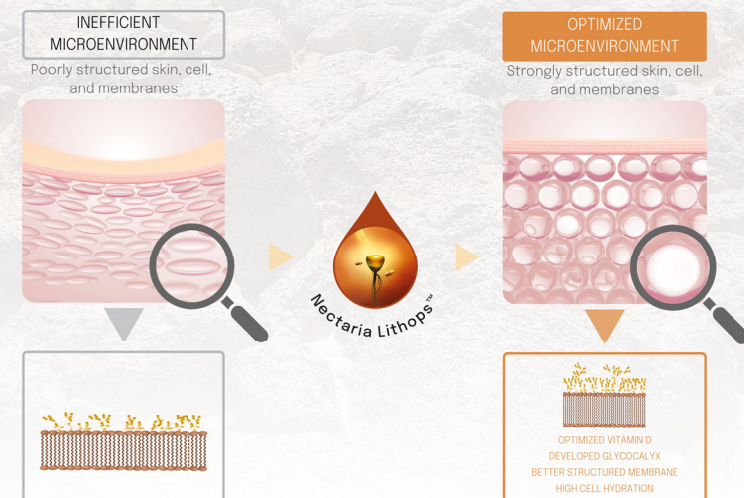

Natural tanning, even without the sun!

- antibacterial effects
- moisturizing
- skin biome stabilizing

A healthy anti-aging booster.

Lumisterol

Creates a natural vitamin D reservoir in the skin.

Naturally convincing

ILANGA
renewing freshness

ILANGA - renewing freshness

Natural mode of action

Revitalizing & balancing

Makes your skin glow

For your daily moment of wellness!
