

SonneNatural™

Chemistry. By Nature.™

To deliver 100% plant-based emollients,
we found the perfect partner.

sonneborn™

AN HF SINCLAIR BRAND

SonneNatural™

NATURAL AND PERFECT. Let's face it. Everything that is "perfectly natural" is not always "naturally perfect." Consider the most valuable and precious diamond, colorless and brilliantly scintillating. Perfectly natural? Yes. Naturally perfect? No, it takes highly skilled experts to transform what nature provides into the perfect finished product. Products that are "all natural" are oftentimes inferior substitutes regarding quality, odor, color and performance. That is why Sonneborn SonneNatural™ products are your best choice for 100% plant-based emollients. As the global leading supplier of the highest-quality petrolatum, we utilize our expertise in petrolatum development, hydrocarbon formulating and manufacturing capabilities to make the finest range of natural emollients imaginable.

EXPERTISE AND INNOVATION. Since 1903, Sonneborn, an HF Sinclair brand, has been synonymous with the world's highest-quality refined hydrocarbons for personal care and

pharmaceutical applications. Our goal is to provide customers with premium products made in the USA, progressive technical capabilities and dependable service so they receive the very best value in the industry. Together with continued growth in our fundamental product lines, the Sonneborn brand has applied core strengths to transcend traditional technologies and deliver exciting new products to the market.

ELEGANT AND EFFECTIVE. While the demand for high-performing emollients and moisture retention ingredients prevails, the desire for elegant, yet all plant-based alternatives continues. The SonneNatural line offers a full range of 100% natural alternatives to traditional petrolatum used in personal care and pharmaceutical formulations by adding exceptional lubricity and moisture protection to lotions, creams, ointments and hand cleaners. The chart on page 5 summarizes the physical properties of SonneNatural products compared to petrolatum product White Protopet™ 1S.

Chemistry. By Nature.™ The Sonneborn family of products has been soothing people since they were babies. We continue to build on our innovation, developing new and better products that deliver a natural fit in today's world. The company that has brought you the purest, highest-quality hydrocarbon chemistry by nature now brings you the finest plant chemistry by nature. Together, we can work to develop new, innovative product formulations.

SonneNatural Select is an extension of our 100% certified plant-based line, blended with botanicals rich in omega-3, omega-6 and omega-9 fatty acids. These products provide emolliency with a range of aesthetic and sensory attributes, with botanical benefits for ease in formulation and product enhancement.

SonneNatural Select — Jojoba Oil Enhanced

utilizes the seed oil of the jojoba plant.

- An all-natural blend rich in omega-9 fatty acids
- It is soft and glossy, and has a nice smooth application
- Jojoba oil is the natural oil closest in chemical composition to human sebum

SonneNatural Select — Meadowfoam Seed Oil Enhanced

utilizes the seed oil of the meadowfoam plant.

- It is rich in omega-6 and omega-9 fatty acids
- Offers the ultimate silky, smooth application with medium cushion and gloss
- Meadowfoam seed oil adheres well to the skin and helps to rejuvenate skin's appearance

SonneNatural Select — Extra Virgin Olive Oil Enhanced

utilizes extra virgin olive oil in its formulation.

- Offers an all-natural blend rich in omega-3, omega-6 and omega-9 fatty acids
- Has a smooth application with medium to high cushion and medium to low gloss
- Olive oil naturally moisturizes the skin and aids its elasticity

SonneNatural, SonneNatural 200 Series and SonneNatural Select Products: Nature's Finest Emollients.

SonneNatural CB19	Best w / cannabinoids (e.g., CBD)	+++	++	+	+	++++

+ = low ++ = low-medium +++ = medium ++++ = high

SonneNatural is a soft, translucent-yellow, medium-gloss product. It has a creamy application, excellent spread, low slip and nice cushiony feel. The combination of softness and luxurious feel makes this product an excellent natural alternative to petrolatum in cosmetic formulations. SonneNatural also has almost no odor and is color stable.

SonneNatural PF-1 is the palm free version of SonneNatural.

SonneNatural 200 Series offers two distinctly unique products: **SonneNatural H-203** and **SonneNatural J-207**.

SonneNatural H-203 offers a firm base product for your formulations.

- Medium cushion, medium to low gloss, low slip, short play time and minimal spreadability
- The short play time delivers body and tack to formulations
- Ideal for hair styling products such as putty and pastes, and for lip balms that require a more compact feel

SonneNatural J-207 offers the natural, classic look and feel of neat petroleum jelly.

- Soft with medium cushion, very glossy with medium slip and playtime, and high spreadability
- Its properties and appearance fit best for a neat petroleum jelly replacement, or for use in elegant lip moisture balms or high-end hair pomades

SonneNatural CB19 is a soft, translucent off-white, medium gloss product. It has a creamy application, excellent spread, low tack and cushiony feel. It is designed to provide a stable delivery emollient for cannabinoids and hemp oils. Using human skin tissue samples, a formulation of CB19 + CBD modified the expression of 10 genes important to skin biology. Affected genes were related to antioxidant / stress response, barrier formation, and inflammatory responses. This activity profile significantly differed from other commercially available CBD delivery vehicles. Taken together, these results show that not all carriers have the same efficacy or activity profile, and that CB19 may provide unique benefits for CBD delivery.

SonneNatural NXG is the firmest emollient in the SonneNatural line. It offers a unique combination of properties. It is very firm upon initial feel, but works down nicely. Additionally, it is non-greasy and exhibits excellent moisture retention with unmatched emolliency. Its low odor may lower your fragrance loading and its occlusive after-feel leaves skin feeling soft and luxurious.

THE 100% PERFECTLY NATURAL SOLUTION.

SonneNatural products impart optimal moisture retention, with a wide range of emolliency and rheological properties to fit your specific formulation requirements. SonneNatural products are ideal natural and renewable options for use in cosmetic applications where an emollient, moisturizer, solubilizer or dispersing agent is required.

SonneNatural Property Comparison to Petrolatum

Property	Test Method	White Protopet™ 1S	SonneNatural	SonneNatural H-203	SonneNatural J-207	SonneNatural Selects
Cone Penetration	ASTM D937	180–210	170	195	210	190
Drop Melting Point, °C (°F)	ASTM D127	54–60 (129–140)	52 (126)	49 (120)	46 (115)	122
Color, Lovibond 2"	IP 17	1.5 Y Max	2.0 Y	1.3 Y	1.0 Y	2.7 Y
Viscosity @ 100°C, cSt	ASTM D445	~12.0	~16.5	~14.6	~11.8	~14.0
Natural Index	ISO 16128	0	0.7	0.6	0.6	0.7
Natural Origin Index	ISO 16128	0	1	1	1	1

Information on natural index and natural origin index as per ISO 16128 is available upon request.

SonneNatural Features and Benefits

Features	Benefits
All-natural, Vegetable Product	INCI Name: Vegetable Oil (U.S.), Olus Oil (EU)
Physical Properties / TEWL Comparable to Petrolatum	Excellent Moisture Retention
Stringent Quality Control	Consistent Quality
Superior UV and Microbial Stability	Naturally Preserved, Long Shelf Life
USP 51 Compliant	Does Not Support Microbial Life
CTFA Compliant: E. coli, S. aureus and P. aeruginosa	Good Safety Profile
Global Supplier	Supply Chain Management

APPLICATIONS. The SonneNatural™ portfolio of products is applicable to many skin and hair products. In skin care, SonneNatural is an excellent moisturizer and skin protectant, keeping skin soft, supple and pliable. In hair care applications, SonneNatural is used in conditioning shampoos, rinse-off and leave-on conditioners, and hair treatment formulas. In styling and finishing products, SonneNatural adds anti-static properties, good combability and defrizzing, and it provides luster plus shine. In color cosmetics, specifically for anhydrous formulations, SonneNatural offers solubilizing, emolliency and color dispersion properties.

Other applications include soap, shaving cream, body scrub, antiperspirant, deodorant, wipes and other products. The uses for SonneNatural are limitless and offer unique properties that enhance personal care products naturally.

MOISTURE RETENTION AND EMOLLIENCY. Ideal skin care formulas typically contain an ingredient that improves barrier function while helping to supplement the natural epidermal lipids. Keeping the skin supple and pliable is very important for creams and lotions. Since petrolatum has long been the benchmark for preventing moisture loss through the skin, we have focused on developing products with similar skin protection. Transepidermal water loss (TEWL) data is available showing that SonneNatural products deliver substantial skin moisturization.

SonneNatural TEWL Comparison to Petrolatum

RHEOLOGY. SonneNatural’s rheology, shown below, is similar to our standard petrolatum, so it behaves in formulations like petrolatum and therefore makes a great natural alternative. SonneNatural products add substantive feel and body to formulations without the negative attributes associated with fillers, such as starch or clay.

THE SONNENATURAL CHOICE. We recognize the importance of even the most subtle, yet specific differences that are often crucial to defining a finished formula. As such, we continue to apply our technical expertise in growing our line of 100% naturally derived emollients. Despite the notion that there is only “one petrolatum,” there are in fact numerous combinations of attributes that lead to uniquely different petrolatum products. Similarly, we apply this same developmental expertise in creating a range of plant-based,

natural emollients. Together, SonneNatural, SonneNatural Select and SonneNatural 200 Series products offer new benchmarks, delivering optimal moisturization and emolliency benefits of petrolatum along with a wide range of sensory characteristics, appearance and spreadability to best meet any formula objective.

Choosing the right product for your specific formulation depends upon both the desired aesthetic and sensory attributes. Key sensory properties to consider in choosing the right SonneNatural product are desired cushion, gloss, slip, playtime and spreadability.
